PUG Ranking Explanation

Outstanding Practice: This means they are exemplary industry leaders. They make sustainable development and environmental and socio-cultural issues their priority. They are striving to be environmentally innovative and socially responsible. They have a positive impact on the environment, local communities, and their clients. They invest both time and money to maintain sustainable tourism practices. They lead with examples and become case studies for others to follow.

Quality Practice: The lodge is both environmentally and socio-culturally responsible. They are continuously working to better their operations and enhance their sustainable travel practices. Management is knowledgeable about environmental/social issues related to their business and is working to become exemplary industry leaders.

Good Practice: This means the lodge operation is low-impact and may consider environmental and social issues in their operational decisions and programming. They do make choices based on environmental and social responsibility, but due to monetary, time, or efficiency issues, have further to go in their commitment
